

## Finally, a ceiling without limits!

Popcorn Ceiling Solution is proud to offer **MA200** – our premier fire-rated stretch fabric ceiling membrane made of 100% polyester. It is made in Germany by Europe’s top technical textile manufacturer using specialty knitting and PU coating technologies.

**MA200 is a unique architectural textile with a high acoustic rating and superb translucent qualities.**

**MA200’s acoustical rating is 0.85 NRC** with 1” industry standard fiberglass backing. Acoustic testing results available upon request.

MA200 is also designed with unique translucent characteristics, making it a perfect material for backlit installations. **Backlit MA200** creates a stunning glow across walls and ceilings.

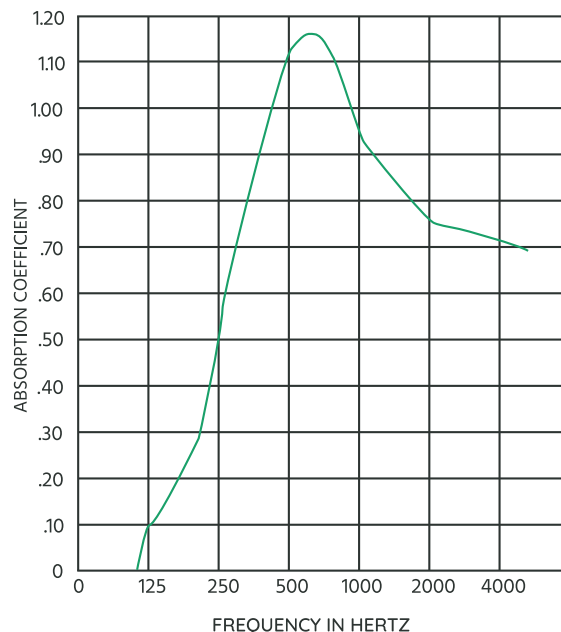

Combined with our wide-span UV printing technologies, it is now possible to add incredible digital images to acoustic and backlit surfaces to create amazing interiors.

## Technical Specifications

### MA200

<b>Widths:</b>	16’ 4” and 10’ 2”
<b>Length:</b>	164’
<b>Cut to Length:</b>	Available
<b>Weight:</b>	260 g/m <sup>2</sup>
<b>Thickness:</b>	0.57 mm
<b>Colors:</b>	White, Custom
<b>Special features:</b>	Acoustic Translucent
<b>Printable:</b>	Yes
<b>Fire Rating:</b>	Class A (ASTM E84)

with 1” 6lbs Fiberglass  
**NRC.85**

Specimen Area: 64 sq ft  
Temperature: 78.6 deg. F  
Relative Humidity: 46.0%  
Atm. Pressure: 28.54 in. of Hg
