

Luminous Stretch Fabric Ceiling

A translucent textile is designed to let a percentage of light through the textile. This gives architects and designers the flexibility to build intricate lighting and illuminance designs into their plans.

Lucid Canvas allows percentage of directed light to travel through the textile. When backlit this creates a stunning glow across walls and ceilings.

Combined with our wide-span printing technologies, it is now possible to add incredible image effects to backlit surfaces to create amazing interior spaces.

Technical Specifications

Lucid Canvas

Widths:	16' 4" and 10' 2"
Length:	164'
Cut to Length:	Available
Weight:	250 g/m ²
Thickness:	0.35 - 0.38 mm
Colors:	White, Custom
Special features:	Translucent
Printable:	Yes
Fire Rating:	Class A (ASTM E84)
